SAFETY PRECAUTIONS

CAUTION
 RISK OF ELECTRIC SHOCK
 DO NOT OPEN

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

WARNING: TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

安全注意事項

CAUTION
 RISK OF ELECTRIC SHOCK
 DO NOT OPEN

注意：為減少觸電危險，切勿拆下機殼（或機背）。機身內並無用戶修理用零件。請交由專業修理人員修理本機。

三角形內有箭頭的閃電符號旨在提醒用戶，本產品機殼內有未經絕緣的危險電壓，其幅度足以使人觸電而發生危險。

三角形內加感嘆號旨在提醒用戶，有重要的操作與維修說明書配合本機。

警告：為減少著火或觸電危險，切勿讓本機受雨淋濕或受潮。

Make the following settings before connecting the components.
連接各設備之前請先進行下列設定。

- Setting the line voltage (AVR-750/770)
- 設定電源電壓 (AVR-750/770)

- The customer can set the VOLTAGE SELECTORS on the back panel for appropriate line voltage by using a screwdriver.
- Do not use excessive force in setting the VOLTAGE SELECTOR KNOB — you may damage it.
- If the VOLTAGE SELECTOR KNOB does not move smoothly, contact your store of purchase.
- 用戶可利用螺絲起子將機背的VOLTAGE SELECTORS (電壓選擇器) 設定到適當的電壓電壓。
- 旋轉電壓選擇器時請勿太用力，以免損壞。
- 如果電壓選擇器旋轉時不順，請向你們購入本機的商號查詢。

CAUTION:

- Be sure to set both voltage selectors to same position.
- 各電壓選擇器均須設定到同樣的位置。

NOTE ON USE

 <p>• Avoid high temperatures. Allow for sufficient heat dispersion when installed on a rack.</p>	 <p>• Keep the set free from moisture, water, and dust.</p>	 <p>• Do not let foreign objects in the set.</p>
 <p>• Handle the power cord carefully. Hold the plug when unplugging the cord.</p>	 <p>• Unplug the power cord when not using the set for long periods of time.</p>	 <p>• Do not let insecticides, benzene, and thinner come in contact with the set.</p>
 <p>• (For sets with ventilation holes) • Do not obstruct the ventilation holes.</p>	 <p>• Never disassemble or modify the set in any way.</p>	

使用注意事項

 <p>防止高溫</p> <p>• 勿將本機放置於烈日曝曬或靠近發熱器材的位置。</p>	 <p>注意濕氣、水和塵</p> <p>• 勿將本機放置於溫度很高或多塵的位置。花籃或具有水的物件均不宜置在本機上方。</p>	 <p>勿讓雜物掉入機內</p> <p>• 特別要留意勿鋼針、髮夾、硬幣等進入本機。</p>
 <p>機架/機箱安裝注意</p> <p>• 避免將本機裝於密封的機架內。</p> <p>• 裝於機架或機箱時，要配備足夠大的通風孔，以加強散熱。</p>	 <p>當你外出時</p> <p>• 長時間不用本機時，例如外出旅行時，請將插頭拔離電源插座。</p>	 <p>保護機殼</p> <p>• 避免在本機附近噴灑殺蟲劑，也勿用汽油、天拿水或溶劑清潔機殼，因這等液體易引起品質或顏色改變。抹拭要用軟布，在用化學處理過的布指抹時請小心遵守說明書規定。</p>
 <p>留意電源線</p> <p>• 從插頭拔出插頭時切勿拉電源線，應抓握住插頭將其拔出。</p>	 <p>勿堵塞機殼的通風孔</p> <p>• 堵塞通風孔會損壞本機。</p> <p>• 各通風孔對本機內部散熱異常重要，必須特別留意，若通風孔有物件阻塞，就會使機內溫度升高而損壞。</p>	 <p>勿打開機殼</p> <p>• 打開機殼頂蓋或底蓋，及伸手入機殼內部是危險的。切勿打開機殼。如果本機表現有不妥當時，宜立即拔下電源插頭，再向購入本機之商店或鄰近經銷商聯絡。</p>

- We greatly appreciate your purchase of the AVR-750/760/770/780.
 ■ To be sure you take maximum advantage of all the features the AVR-750/760/770/780 has to offer, read these instructions carefully and use the set properly. Be sure to keep this manual for future reference should any questions or problems arise.

"SERIAL NO. _____"
PLEASE RECORD UNIT SERIAL NUMBER ATTACHED TO THE REAR OF THE CABINET FOR FUTURE REFERENCE"

ACCESSORIES

Check that the following parts are included in addition to the main unit:

1 Operating instructions	1	4 AM loop antenna	1
2 Remote control unit (RC-840)	1	5 FM indoor antenna	1
3 R6P/AA batteries	2	6 Plug adaptor (AVR-750/770)	1

1 INTRODUCTION

INSTALLATION PRECAUTIONS

Using this receiver or other electronic equipment containing microprocessors simultaneously with a tuner or TV may result in noise in the sound or picture.

If this should happen, take the following steps:

- Install this unit as far as possible from the tuner or TV set.
- Keep the antenna lines of the tuner or TV as far as possible from the receiver's power cord and connection cables.
- This problem is especially frequent when using indoor antennas. We recommend using outdoor antennas and 75 Ω ohms coaxial cables.

For heat dispersal, leave at least 10 cm of space between the top, back and sides of this unit and the wall or other components.

CAUTION:

Whenever the POWER operation switch is in the OFF position, the unit is still connected on AC line voltage. Please be sure to unplug the cord when you leave home for, say, a vacation.

2 CONNECTIONS

- Do not plug in the power cord until all connections have been completed.
- Be sure to connect the left and right channels properly (left with left, right with right).
- Insert the plugs securely. Incomplete connections will result in the generation of noise.
- Note that binding pin plug cords together with power cords or placing them near a power transformer will result in the introduction of hum or other noise.
- Noise or humming may be generated if a connected component is used independently without turning the power of the AVR-750/760/770/780 on. If this happens, turn on the power of the AVR-750/760/770/780.

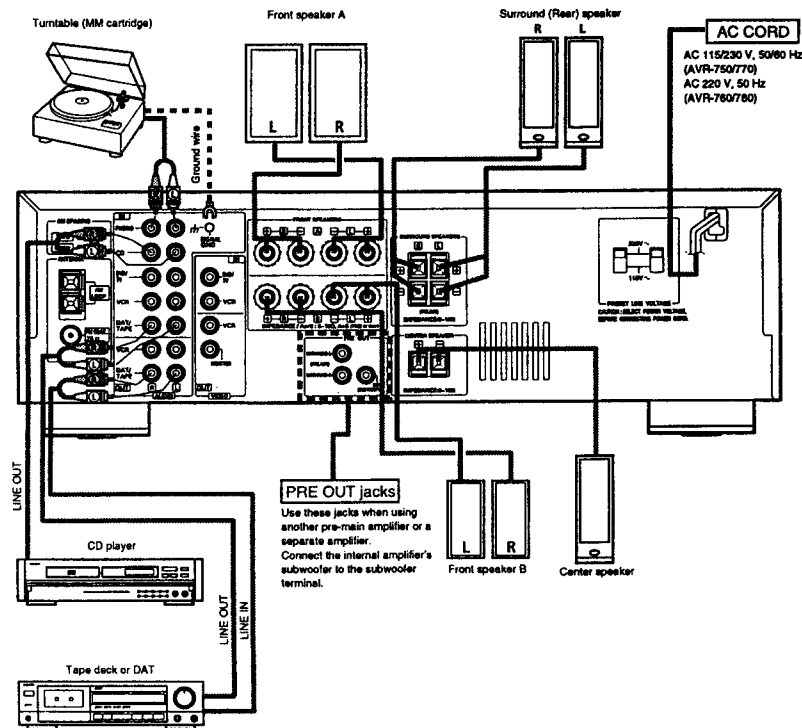

2-1 Connecting the audio components

NOTE:

This unit cannot be used with MC cartridges directly. Use a separate head amplifier or step-up transformer.

Precautions when connecting speakers

If a speaker is placed near a TV or video monitor, the colors on the screen may be disturbed by the speaker's magnetism. If this should happen, move the speaker away to a position where it does not have this effect.

2-2 Speaker System Connections

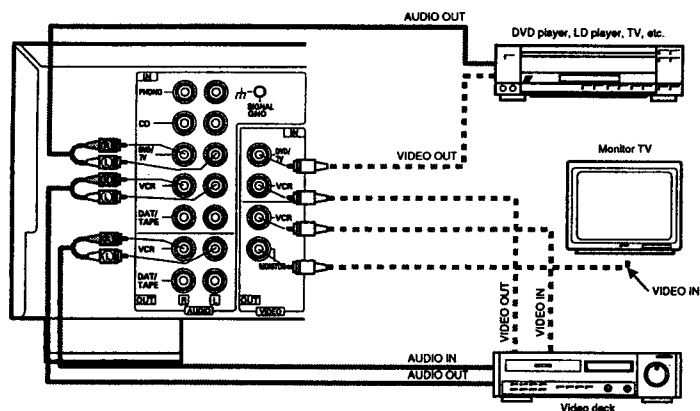

- This unit can accommodate connections of a total of seven speakers including two sets of front speakers (A and B), one set of SURROUND (REAR) speakers, and one center speaker.
- Connect the speaker terminals with the speakers making sure that like polarities are matched (⊕ with ⊕, ⊖ with ⊖). Mismatching of polarities will result in weak central sound, unclear orientation of the various instruments, and the sense of direction of the stereo being impaired.
- When making connections, take care that none of the individual conductors of the speaker cord come in contact with adjacent terminals, with other speaker cord conductors, or with the rear panel.

- Speaker Impedance**
 - When speaker systems A and B are used separately, speakers with an impedance of from 8 to 16 Ω/ohms can be connected.
 - When using with two pairs of speakers (A + B), use speakers with an impedance of 16 Ω/ohms or greater.
 - Speakers with an impedance of 8 to 16 Ω/ohms can be connected for use as center and SURROUND (REAR) speakers.
 - The protection circuit may operate or damage may occur when speakers with an impedance outside of the above range are used.

2-3 Connecting the video components

To connect the video signal, connect using a 75 Ω/ohms video signal cable cord. Using an improper cable can result in a drop in sound quality.

2-4 Connecting the antenna terminals

ANTENNA INSTALLATION

- FM ANTENNA**
The supplied FM antenna can be used inside wooden houses for receiving local FM stations and other strong FM signals. Stretch out the ends of the antenna and mount the antenna on the wall or ceiling where optimum reception is achieved. A indoor FM antenna may not consistently ensure stable reception, due to environment changes. In such cases, the indoor FM antenna should only be used temporarily until an outdoor FM antenna has been installed. When connecting an outdoor FM antenna, the use of 75 Ω/ohms coaxial cable (3C - 2V, 5C - 2V) is strongly recommended.

- AM ANTENNA**
Tune in an AM station (refer to page 12, 13) listen to the sound, then install the antenna in a position as far from the set as possible in which distortion and noise are minimum. Good reception of AM stations is not possible if the loop antenna is not connected or if it is touching metal objects.

- NOTES**
- This receiver has a full back-up system. When the power is turned on, the INPUT SELECTOR buttons are set to the last mode set before the power was turned off.
 - When using this receiver in close proximity to video equipment (TV, VCR, DVD, etc.), noise may be generated in AM broadcasts. To avoid this, keep the receiver as far away from other video components as possible, or place the AM loop antenna where noise is reduced. If the noise is not reduced, turn off the power of the video components when listening to AM broadcasts.

Note to CATV system installer:
This reminder is provided to call the CATV system installer's attention to Article 820 - 40 of the NEC which provides guidelines for proper grounding and, in particular, specifies that the cable ground shall be connected to the grounding system of the building, as close to the point of cable entry as practical.

3 REMOTE CONTROL UNIT

Following the procedure outlined below, insert the batteries before using the remote control unit.

Range of operation of the remote control unit

Point the remote control unit at the remote control sensor as shown on the diagram at the left.

NOTES:

- The remote control unit can be used from a straight distance of approximately 7 meters/20 feet, but this distance will shorten or operation will become difficult if there are obstacles between the remote control unit and the remote control sensor, if the remote control sensor is exposed to direct sunlight or other strong light, or if operated from an angle.
- Neon signs or other devices emitting pulse-type noise nearby may result in malfunction, so keep the set as far away from such devices as possible.

Inserting the batteries

NOTES:

- Use only AA, R6P, UM-3 batteries for replacement.
- Be sure the polarities are correct. (See the illustration inside the battery compartment.)
- Remove the batteries if the remote control transmitter will not be used for an extended period of time.
- If batteries leak, dispose of them immediately. Avoid touching the leaked material or letting it come in contact with clothing, etc. Clean the battery compartment thoroughly before installing new batteries.
- Have replacement batteries on hand so that the old batteries can be replaced as quickly as possible when the time comes.

■ System code buttons

DENON remote-controllable audio components can be controlled using this unit's remote control unit. Note that some components, however, cannot be operated with this remote control unit.

4 OPERATIONS

4-1 Preparations for playback

- Check that all connections are proper.
- Set to the minimum position.

- Turn on the power.
Press the POWER operation switch (button).

- ON/STANDBY**
The power turns on and "STANDBY" indicator is lit. Several seconds are required from the time the POWER operation switch is set to the "ON/STANDBY" position until sound is output. This is due to the built-in muting circuit that prevents noise when the POWER operation switch is turned on and off. Set the POWER operation switch to this position to turn the power on and off from the included remote control unit (RC-840).
- OFF**
The power turns off and "STANDBY" indicator is off. In this position, the power cannot be turned on and off from the remote control unit.

- Select the front speakers.
Press the speaker A or B switch to turn the speaker on.

NOTE:
In the standby mode
If you lose the remote control unit, the power can be turned on by initializing the microprocessor.
For the operating procedure, see: [5] INITIALIZATION OF THE MICROPROCESSOR on page 13
Note that this operation will clear the last function memory.

4-2 Playing the program source (Stereo playback)

- Select the source to be played.

- Select the STEREO mode.

- Adjust the MASTER VOLUME control.

- Adjust the front left/right BALANCE.
Turn the control counterclockwise to reduce the volume of the right channel, clockwise to reduce the volume of the left channel.

- Adjust the BASS and TREBLE.

4-3 Simulcast playback

Use this switch to monitor a video source other than the audio source.

- Press and hold the VIDEO SELECT button until the desired source appears on the display.

- Cancelling simulcast playback
- Press the VIDEO SELECT button once more.
- Select the VIDEO function.

4-4 Using the muting function

Use this to turn off the audio output temporarily.

- Press the MUTING button.
- Cancelling MUTING mode.
Press the MUTING button again.

This function can only be set from the remote control unit.
The STANDBY LED flashes when the muting function is set.

4-5 Listen with headphones

Connect the headphones to the PHONES jack.
When listening with headphones privately, set A, B SPEAKER switches and the superwoofer's power switch to the OFF position and set the stereo surround mode.

NOTE:

To prevent hearing loss, do not raise the volume level excessively when using headphones.

4-6 Recording the program source

(recording the source currently being monitored)

- Follow steps ① to ④ under "Playing the program source". (refer to page 9)
- Start recording on the tape or video deck. For instructions, refer to the component's operating instructions.

Simultaneous recording

The signals of the source selected with the function selector button are output simultaneously to the DAT/TAPE and VCR REC OUT jacks. If a total of two tape and/or video decks are connected and set to the recording mode, the same source can be recorded simultaneously on both decks. In addition, if the TAPE MONITOR (DAT/TAPE) button is pressed, the audio signals from the tape deck are output to the VCR AUDIO REC OUT jacks.

4-7 Front panel display

Descriptions of the unit's operations are also displayed on the front panel display. In addition, the display can be switched to check the unit's operating status while playing a source by pressing the PANEL button.

4-8 Using the surround function

Types of surround modes and their characteristics

1	DOLBY PRO LOGIC	Use this when playing program sources recorded in Dolby Surround or Dolby Stereo.
2	CONCERT HALL	Use this setting to create the atmosphere of a concert hall. There will be no output from the center speaker.
3	LIVE	Use this setting to create the atmosphere of watching a live performance. There will be no output from the center speaker.

• Before using the surround function

Make the following adjustments before using the surround function.

- Set the Dolby Pro Logic mode.

- Select the center mode (refer to page 11).

Select the center mode according to the center speaker.

- Emit the test tone.

Test tones are produced from the speakers in the order shown below, at 4 second intervals for the first two cycles, 2 second intervals after that.

- Adjust the center and surround (rear) levels to set the volume of the speakers to the same level.

- Turn the test tone off.

- Adjust the delay time and seating position as necessary (refer to page 11).

Dolby Surround systems with Pro Logic decoding most closely replicate the Dolby Stereo theatrical experience. Only two surround speakers are necessary in the home listening environment to provide the same enveloping soundfield as multiple surround speakers in the theater.

Personal Memory Plus function for EASY TO USE

The AVR-750/760/770/780 automatically stores the surround mode adding effects for all input sources. The corresponding surround mode is recalled automatically each time an input source is selected.

• Using the surround function

- Select the surround mode according to the input source.

- If necessary, adjust the levels.

- Adjust the parameters to the desired settings.

Center Mode

Set the center mode as described below, according to the type of center speaker being used.

Normal mode: This mode is suited for an arrangement in which the center channel speaker is smaller than the left and right speakers. Signals below 100 Hz which have almost no effect on directional orientation are distributed to the left and right channels, whereas the center channel output signals greater than 100Hz. As a result, the bass of the left and right channels increases the apparent deepness of the sound.

Wide mode: This mode is suited for an arrangement in which the center channel speaker is of the same grade as the left and right speakers. The entire sound band from low region to high is output to the center channel to provide an exciting sound field for your enjoyment.

Phantom mode: Use this mode when center channel speaker is not used. A directional emphasis circuit provides signal reproduction which is electrically oriented to the center and this provides an exciting sound field for your enjoyment.

Delay Time

The optimum delay time will differ depending on the listening position. Referring to the chart at left, set the optimum delay time for your room's space and seating position. For example, when the distance from the front speakers to the listening position is 20 feet and that from the surround (rear) speakers to the listening position is 15 feet, the optimum delay time will be 21 ms. The variable range of the delay time differs depending on the mode.

Operating Possible in the Various Surround Modes

The following is a list of the buttons and functions which can be operated during the different surround modes. Figures in parentheses indicate adjustment ranges.

		OUTPUT	CENTER LEVEL	SURROUND (REAR) LEVEL	CENTER MODE	TEST TONE	DELAY TIME
DOLBY PRO LOGIC	NORMAL	○	○ (0 -- 24dB)	○ (0 -- 24dB)	○	○	○ (15 -- 30ms)
	PHANTOM	○	X	○ (0 -- 24dB)	○	○	○ (15 -- 30ms)
	WIDE	○	○ (0 -- 24dB)	○ (0 -- 24dB)	○	○	○ (15 -- 30ms)
CONCERT HALL		○	X	○ (0 -- 24dB)	△*	X	○ (0 -- 33ms)
LIVE		○	X	○ (0 -- 24dB)	△*	X	○ (0 -- 33ms)

*1 Switches to the Dolby Pro Logic from any modes other than Dolby Pro Logic.
The level of the center and surround (rear) channels can be adjusted by 2 dB step.
The delay time can be set by 1.5 ms step.

○: Operation possible X: Operation not possible

- The sound may be distorted for some sources if the surround (rear) level is raised during surround playback. If this happens, lower the surround (rear) level.

5 LISTENING TO THE RADIO

5-1 Setting the frequency step (AVR-750/770)

To know the tuning frequency steps, see the Table of Tuning Frequency Steps.

TABLE OF TUNING FREQUENCY STEPS		
BAND	FM	AM
STEP AM SPACING: 9 kHz	0.05 MHz	9 kHz
STEP AM SPACING: 10 kHz	0.2 MHz	10 kHz

The tuning frequency steps are switchable between 9 kHz and 10 kHz for AM, between 0.05 MHz and 0.2 MHz for FM. To switch the tuning frequency steps, disconnect the power plug and set the AM SPACING switch (1) on the rear panel to the desired position. Then plug in the AC mains again.

5-2 Auto preset memory

This unit is equipped with a function for automatically searching for FM broadcast stations and storing them in the preset memory.

- Turn on the unit while holding in the MEMORY button. The unit automatically begins searching for FM broadcast stations.

ON / STANDBY ▲ OFF

- When the first FM broadcast station is found, that station is stored in the preset memory at channel A1. Subsequent stations are automatically stored in order at preset channels A2 to A8, B1 to B8, C1 to C8, D1 to D8 and E1 to E8, for a maximum of 40 stations.

5-3 Auto tuning

- Set the input function to "TUNER".

- Watching the display, press the BAND button to select the desired band (AM or FM).

- Press the MODE button to set the auto tuning mode.

"AUTO" appears on the display.

12

- Channel A1 is tuned in after the auto preset memory operation is completed.

NOTES:

- If an FM station cannot be preset automatically due to poor reception, use the "Manual tuning" operation to tune in the station, then preset it using the manual "Preset memory" operation.
- To interrupt this function, press the POWER operation button.

- Press the TUNING UP or DOWN button.

Automatic searching begins, then stops when a station is tuned in. If tuning does not stop at the desired station, use the "Manual tuning" operation.

5-4 Manual tuning

- Set the input function to "TUNER".
- Watching the display, press the BAND button to select the desired band (AM or FM).
- Press the MODE button to set the manual-tuning mode. Check that the display's "AUTO" indicator turns off.

NOTES:

- When in the auto tuning mode on the FM band, the "STEREO" indicator lights on the display when a stereo broadcasts tuned in. At open frequencies, the noise is muted and the "TUNED" and "STEREO" indicators turn off.
- When the manual tuning mode is set, FM stereo broadcasts are received in monaural and the "STEREO" indicator turns off.

5-5 Preset memory

- Use the "Auto tuning" or "Manual tuning" operation to tune in the station to be preset in the memory.

- Press the MEMORY button.

- Press the SHIFT button and select the desired memory block (A to E).

- Press the PRESET UP or DOWN button to select the desired preset channel (1 to 8).

5-6 Recalling preset stations

- Watching the display, press the SHIFT button to select the preset memory block.

- Watching the display, press the PRESET UP or DOWN button to select the desired preset channel.

6 INITIALIZATION OF THE MICROPROCESSOR

When the indication of the display is not normal or when the operation of the unit does not show the reasonable result, the initialization of the microprocessor is required by the following procedure.

- Switch off the unit using the main unit's POWER operation switch.
- Hold the following TUNER button and VIDEO SELECT button, and turn the main unit's POWER operation switch on.
- Check that the entire display is flashing with an interval of about 1 second, and release your fingers from the 2 buttons.
- Switch on the unit and the microprocessor will be initialized.

NOTE:

- When the microprocessor is reset, all the settings you have made are reset to the values set upon shipment from the factory.

- Press the TUNING UP or DOWN button to tune in the desired station. The frequency changes continuously when the button is held in.

- Press the MEMORY button again to store the station in the preset memory.

To preset other channels, repeat steps 2 to 3. A total of 40 broadcast stations can be preset - 8 stations (channels 1 to 8) in each of blocks A to E.

7 LAST FUNCTION MEMORY

- This unit is equipped with a last function memory which stores the input and output setting conditions as they were immediately before the power is switched off. This function eliminates the need to perform complicated resettlings when the power is switched on.
- This unit is also equipped with a back-up memory. This function provides approximately one week of memory storage with the power cord disconnected.

8 TROUBLESHOOTING

If a problem should arise, first check the following:

- Are the connections correct?
 - Have you followed all operational instructions correctly?
 - Are the speakers, turntable, and other components operating properly?
- If the receiver is not operating properly, check the items listed in the table below. Should the problem persist, there may be a malfunction. Disconnect the power immediately and contact your store of purchase.

	Symptom	Cause	Measures	Page
Common problems arising when listening to the CD, records, tapes, and FM broadcasts, etc.	DISPLAY not lit and sound not produced when power operation switch set to on.	• Power cord not plugged in securely.	• Check the insertion of the power cord plug.	5
	DISPLAY lit but sound not produced.	• Speaker cords not securely connected. • Speaker switch is off. • Improper position of the audio function button. • Volume control set to minimum. • MUTING is on.	• Connect securely. • Turn on speaker switch. • Set to a suitable position. • Turn volume up to suitable level. • Switch off MUTING.	5, 6 8 9 9
	—PROTECT— display appears.	• Speaker terminals are short-circuited. • Block the ventilation holes of the set.	• Switch power off, connect speakers properly, then switch power back on. • Turn off the set's power, then ventilate it well to cool it down. Once the set is cooled down, turn the power back on.	5, 6 3, 4
		• The unit is operating at continuous high power conditions and/or inadequate ventilation.	• Turn off the set's power, then ventilate it well to cool it down. Once the set is cooled down, turn the power back on.	3, 4
	Sound produced only from one channel.	• Incomplete connection of speaker cords. • Incomplete connection of input/output cords. • Left/right balance is off.	• Connect securely. • Connect securely. • Adjust balance knob properly.	5, 6 5, 6 8
	Positions of instruments reversed during stereo playback.	• Reverse connections of left and right speakers or left and right input/output cords.	• Check left and right connections.	5, 6
	Sound seems distorted.	• Surround (rear) level is too high.	• Set the Surround (rear) level to lower level.	10, 11
	Humming noise produced when record is playing.	• Ground wire of turntable not connected properly. • Incomplete PHONO jack connection. • TV or radio transmission antenna nearby.	• Connect securely. • Connect securely. • Contact your store of purchase.	5 5 —
	Howling noise produced when volume is high.	• Turntable and speaker systems too close together. • Floor is unstable and vibrates easily.	• Separate as much as possible. • Use cushions to absorb speaker vibrations transmitted by floor. If turntable is not equipped with insulators, use audio insulators (commonly available).	— —
	Sound is distorted.	• Stylus pressure too weak. • Dust or dirt on stylus. • Cartridge defective.	• Apply proper stylus pressure. • Check stylus. • Replace cartridge.	— — —
When playing records	Volume is weak.	• MC cartridge being used.	• Replace with MM cartridge or use a head amplifier or step-up transformer.	5
	Receiver does not operate properly when remote control unit is used.	• Batteries dead. • Remote control unit too far from receiver. • Obstacle between receiver and remote control unit. • Different button is being pressed. • Ⓟ and Ⓢ ends of battery inserted in reverse.	• Replace with new batteries. • Move closer. • Remove obstacle. • Press the proper button. • Insert batteries properly.	7 7 7 7, 8 7

Signal to Noise Ratio (HF-A): MONO 80 dB

STEREO 75 dB

Total Harmonic Distortion MONO 0.15 %

(at 1 kHz) STEREO 0.3 %

• Video Section

Standard video jacks

Input and output level/impedance: 1 Vp-p/75 Ω/ohms

Frequency response: 2 Hz to 8 MHz + 0, – 3 dB

• General

Power supply:

AC 115/230V, 50/60 Hz (AVR-750/770)

AC 220V, 50 Hz (AVR-760/780)

180 W

Power consumption:

Maximum external dimensions: 434 (W) x 142 (H) x 315 (D) mm (17-3/32" x 5-19/32" x 12-25/64") (AVR-750/760)

471 (W) x 143 (H) x 315 (D) mm (18-35/64" x 5-41/64" x 12-25/64") (AVR-770/780)

Weight: 7.8 kg (17 lbs 7 oz) (AVR-750/760)

8.8 kg (19 lbs 7 oz) (AVR-770/780)

• Remote control unit

System remote control

RC-840:

Total buttons: 28

DENON system code

CD player: 6 buttons } (SWITCHED)

Cassette deck: 6 buttons }

AVR-750/760/770/780 fixed codes:

22 buttons

Batteries: R6P/AA Type (two batteries)

External dimensions: 51 (W) x 175 (H) x 18.5 (D) mm (2" x 6-57/64" x 47/64")

Weight: 100 g (Approx. 3.5 oz) (including batteries)

* For purposes of improvement, specifications and design are subject to change without notice.

WIRE ARRANGEMENT

In case of wires require unclasping or loosening to move the location to perform adjustment or part replacement, be sure to rearrange them neatly to restore properly in the same location as they were originally placed, or causing to produce a noise may occasionally occur.

DISASSEMBLY

(To reassemble reverse disassembly)

1. Top Cover

Remove 4 screws ① and 4 screws ②.

3. Inner Panel

- (1) Pull out Volume knob ④ and 3 round knobs ⑤.
- (2) Remove 5 nuts ⑥.
- (3) Remove 2 screws ⑨.

2. Front Panel

Remove 5 screws ③.

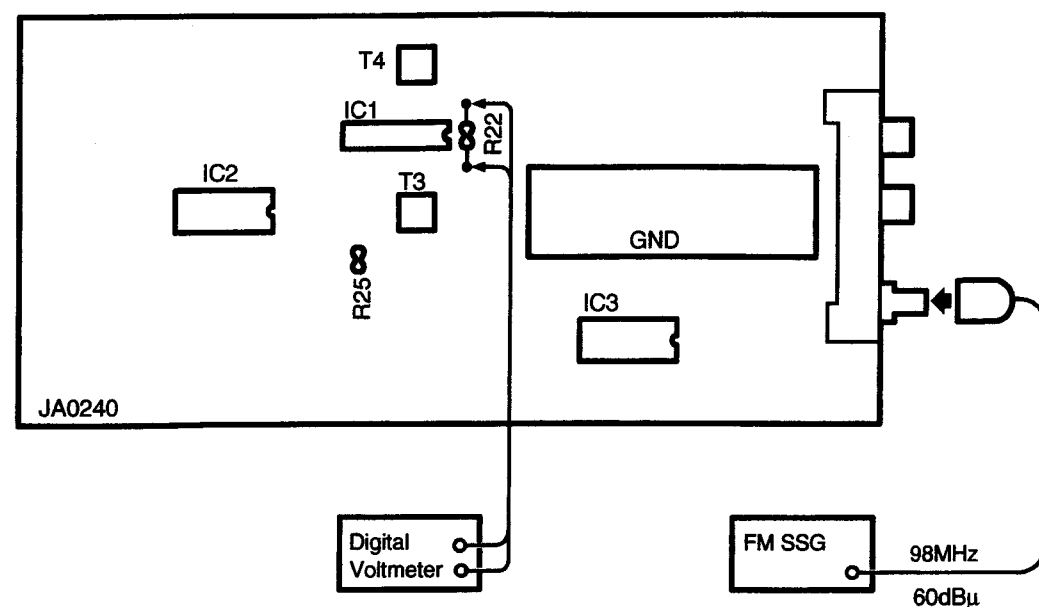

4. Rear Panel

- (1) Disconnect cord bush ⑩.
- (2) Remove 5 screws ⑪, and 22 screws ⑫.
- * Screws ⑫ are tighten.
- (3) Remove 1 screw ⑬.

CONNECTION DIAGRAM OF MEASURING INSTRUMENTS

● FM SECTION

Adjust T4 potential difference across R22 to be within 30mV.

● Initiating (Memory clearing) Method

To clear memory contents of microcomputer and restore to the initial state, take the following steps;

1. Press power switch, turn off power of the unit, and set to standby mode.
2. Pull out power cord from wall outlet temporally.
3. Insert power cord into outlet while simultaneously pressing two keys of VIDEO SELECT and TUNER.
4. Press power switch to confirm that memory contents are cleared.

By completion of the above, the initial state is restored. In case the memory can not be cleared due to some reasons, repeat steps 1 through 3.

Note:

When in the Standby mode, the unit is in the Power OFF state when turn Power SW ON with remote control.

● AUDIO SECTION

Idling Current (JA0241)

Required measurement equipment: DC Voltmeter

Arrangement

- (1) Avoid direct blow from an air conditioner or an electric fan, and adjust the unit at normal room temperature 15°C ~ 30°C. (59°F ~ 86°F).

(2) Presetting

- | | | |
|-------------------------------|---|--|
| ● POWER (Power source switch) | → | ON |
| ● MODE (Mode button) | → | STEREO |
| ● FUNCTION (Function button) | → | CD |
| ● VOLUME (Volume control) | → | 0: fully counterclockwise (⌚ min.) |
| ● BASS, TREBLE (Tone control) | → | 0: (Controls to center) |
| ● SPEAKERS (Speaker terminal) | → | No load (Do not connect speaker, dummy resistor, etc.) |

Adjustment

- (1) Remove top cover and set VR401, VR301 and VR302 of JA0241 (Main Unit) at counterclockwise fully.
- (2) Connect DC Voltmeter to test points (Lch TPL, Rch TPR, CENTER ch TPC).
- (3) Connect power cord to AC Line, and turn power switch "ON".
- (4) Allow 15 minutes, and turn VR301, VR302 and VR401 clockwise (⌚) and adjust the TEST POINTS voltage to 1.5 mV \pm 0.5 mV DC.
- (5) After 2 minutes from preset, turn VR301, VR302 and VR401 to set the voltage to 3 mV \pm 0.5mV DC.

76	KEY 2	I	—	Eu	Lv	Z	—	Button input 2.
77	KEY 1	I	—	Eu	Lv	Z	—	Button input 1.
78	MODE 1	I	—	Eu	Lv	Z	—	Model version change input.
79	TU MUTE	O	N	Eu	—	Z	L	Tuner muting output. ("L" at muting)
80		O	N	Eu	—	Z	H	Fixed output on "H".

* port is fixed "L" at RDS non-selection mode.

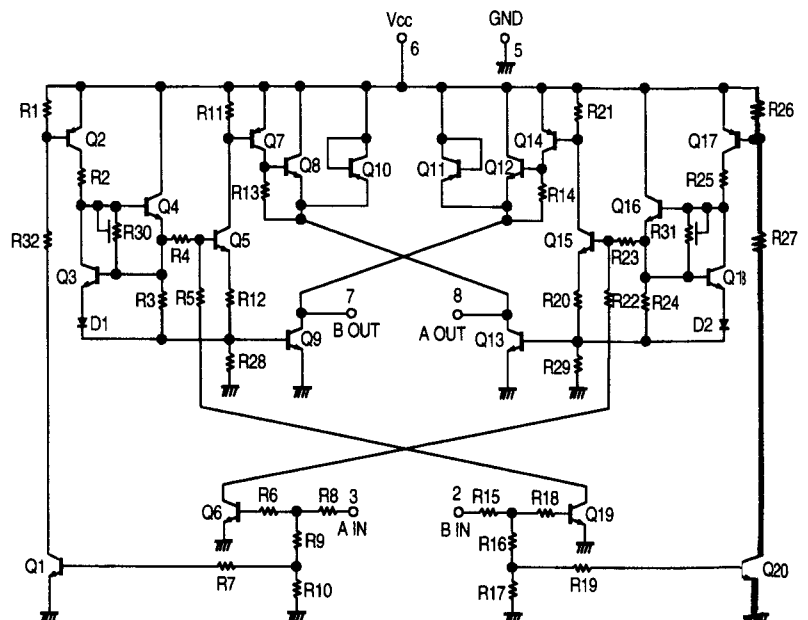

LA1265 (S)
(IC001)

LA3401
(IC002)

BA6208S
(IC265)

LM7001 (IC003)

Terminal Description

SYC	: Clock for controller (400 kHz).
XIN, XOUT	: X'tal OSC (7.2 MHz).
FMIN, AMIN	: Station oscillation signal input.
CE, CL, DATA	: Data input.
BO1, BO2, BO3	: Band data output. BO1 is feasible for time base output (8 Hz).
VDD1, VDD2, VSS	: Power supply. (VDD2 is for back-up).
PD1, PD2	: Charge pump output.

Data Input

— Input from D0.

D0	D1	D2	D3	D4	D5	D6	D7	D8	D9	D10	D11	D12	D13	T0	T1	B0	B1	B2	TB	R0	R1	R2
----	----	----	----	----	----	----	----	----	----	-----	-----	-----	-----	----	----	----	----	----	----	----	----	----

(1) D0(LSB)~D13(MSB) : Frequency dividend data

For FMIN, use D0~D13; for AMIN, use D4~D13.

D0	D1	D2	D3	D4	D5	D6	D7	D8	D9	D10	D11	D12	D13
1	0	1	0	0	0	0	0	0	1	0	1	1	1
LSB													MSB

→ FMIN Frequency dividend nnumber = 14853

x	x	x	x	0	0	0	0	0	1	0	1	1	1
LSB													MSB

→ FMIN Frequency dividend nnumber = 928

(2) T0, T1 : For test of LSI (0,0)

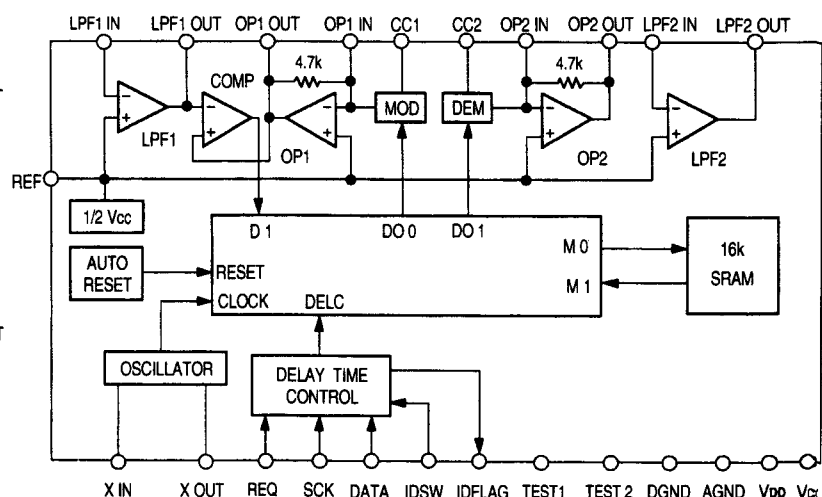

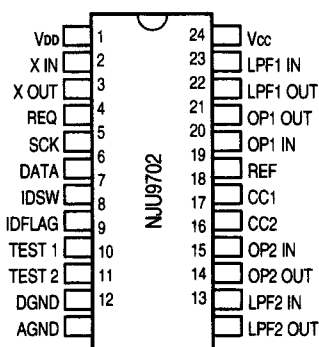

LC78212 (IC102)

LC78212 Terminal Function

Name of Terminal	I/O	Equivalent Internal Circuit	Function of Terminal																					
VDD, VSS VEE			Power terminal.																					
L1~L8, R1~R8 LCOM1~LCOM4, BCOM1~BCOM4		Refer to block diagram	In/Out terminal of analog switch.																					
CL, DI, CE	I		Serial data input terminal (schmidt buffer). CL=Clock input terminal. DI=Data input terminal/ CE=Chip enable terminal.																					
S	I		Selection terminal for using of two. Address will be shifted as per below table when switching S terminal to L or H. <table border="1" data-bbox="777 1176 1319 1294"><thead><tr><th rowspan="2">Name of Item</th><th rowspan="2">S Terminal</th><th colspan="4">Address</th></tr><tr><th>A0</th><th>A1</th><th>A2</th><th>A3</th></tr></thead><tbody><tr><td rowspan="2">LC78212</td><td>L</td><td>0</td><td>1</td><td>0</td><td>1</td></tr><tr><td>H</td><td>1</td><td>1</td><td>0</td><td>1</td></tr></tbody></table>	Name of Item	S Terminal	Address				A0	A1	A2	A3	LC78212	L	0	1	0	1	H	1	1	0	1
Name of Item	S Terminal	Address																						
		A0	A1	A2	A3																			
LC78212	L	0	1	0	1																			
	H	1	1	0	1																			
RES	I		Reset terminal. Condition of analog switch is not fixed at the time of turning on the power. When shift this terminal to L, all analog switches become OFF.

NOTE FOR PARTS LIST

- Part indicated with the mark "◎" are not always in stock and possibly to take a long period of time for supplying, or in some case supplying of part may be refused.
- When ordering of part, clearly indicate "1" and "I" (i) to avoid mis-supplying.
- Ordering part without stating its part number can not be supplied.
- Part indicated with the mark "★" is not illustrated in the exploded view.
- Not including Carbon Film $\pm 5\%$, 1/4W Type in the P.W.Board parts list. (Refer to the Schematic Diagram for those parts.)

WARNING:

Parts marked with this symbol Δ have critical characteristics.
Use ONLY replacement parts recommended by the manufacturer.

● Resistors

Ex.: RN 14K 2E 182 G FR
Type Shape Power Resist- Allowable Others
performance

RD : Carbon	2B : 1/8W	F : $\pm 1\%$	P : Pulse-resistant type
RC : Composition	2E : 1/4W	G : $\pm 2\%$	NL : Low noise type
RS : Metal oxide film	2H : 1/2W	J : $\pm 5\%$	NB : Non-burning type
RW : Winding	3A : 1W	K : $\pm 10\%$	FR : Fuse-resistor
RN : Metal film	3D : 2W	M : $\pm 20\%$	F : Lead wire forming
RK : Metal mixture	3F : 3W		
	3H : 5W		

* Resistance

1 8 2 \Rightarrow 1800 ohm = 1.8 kohm
Indicates number of zeros after effective number.
2-digit effective number.

• Units: ohm

1 R 2 \Rightarrow 1.2 ohm
1-digit effective number.
2-digit effective number, decimal point indicated by R.

• Units: ohm

● Capacitors

Ex.: CE 04W 1H 2R2 M BP
Type Shape Dielectric Capacity Allowable Others
performance strength error

CE : Aluminum foil electrolytic	0J : 6.3V	F : $\pm 1\%$	HS : High stability type
CA : Aluminum solid electrolytic	1A : 10V	G : $\pm 2\%$	BP : Non-polar type
CS : Tantalum electrolytic	1C : 16V	J : $\pm 5\%$	HR : Ripple-resistant type
CQ : Film	1E : 25V	K : $\pm 10\%$	DL : For change and discharge
CK : Ceramic	1V : 35V	M : $\pm 20\%$	HF : For assuring high frequency
CC : Ceramic	1H : 50V	Z : $\pm 80\%$	U : UL part
CP : Oil	2A : 100V	P : $\pm 20\%$	C : CSA part
CM : Mica	2B : 125V	P : $\pm 100\%$	W : UL-CSA type
CF : Metallized	2C : 160V	C : $\pm 0.25\text{pF}$	F : Lead wire forming
CH : Metallized	2D : 200V	D : $\pm 0.5\text{pF}$	
	2E : 250V	= : Others	
	2H : 500V		
	2J : 630V		

* Capacity (electrolyte only)

2 2 2 \Rightarrow 2200 μF
Indicates number of zeros after effective number.
2-digit effective number.

• Units: μF .

2 R 2 \Rightarrow 2.2 μF
1-digit effective number.
2-digit effective number, decimal point indicated by R.

• Units: μF .

* Capacity (except electrolyte)

2 2 2 \Rightarrow 2200pF=0.0022 μF
(More than 2)—Indicates number of zeros after effective number.
2-digit effective number.

• Units: μF .

2 2 1 \Rightarrow 220pF
(0 or 1)—Indicates number of zeros after effective number.
2-digit effective number.

• Units: pF.

• When the dielectric strength is indicated in AC, "AC" is included after the dielectric strength value.

NOTICE.

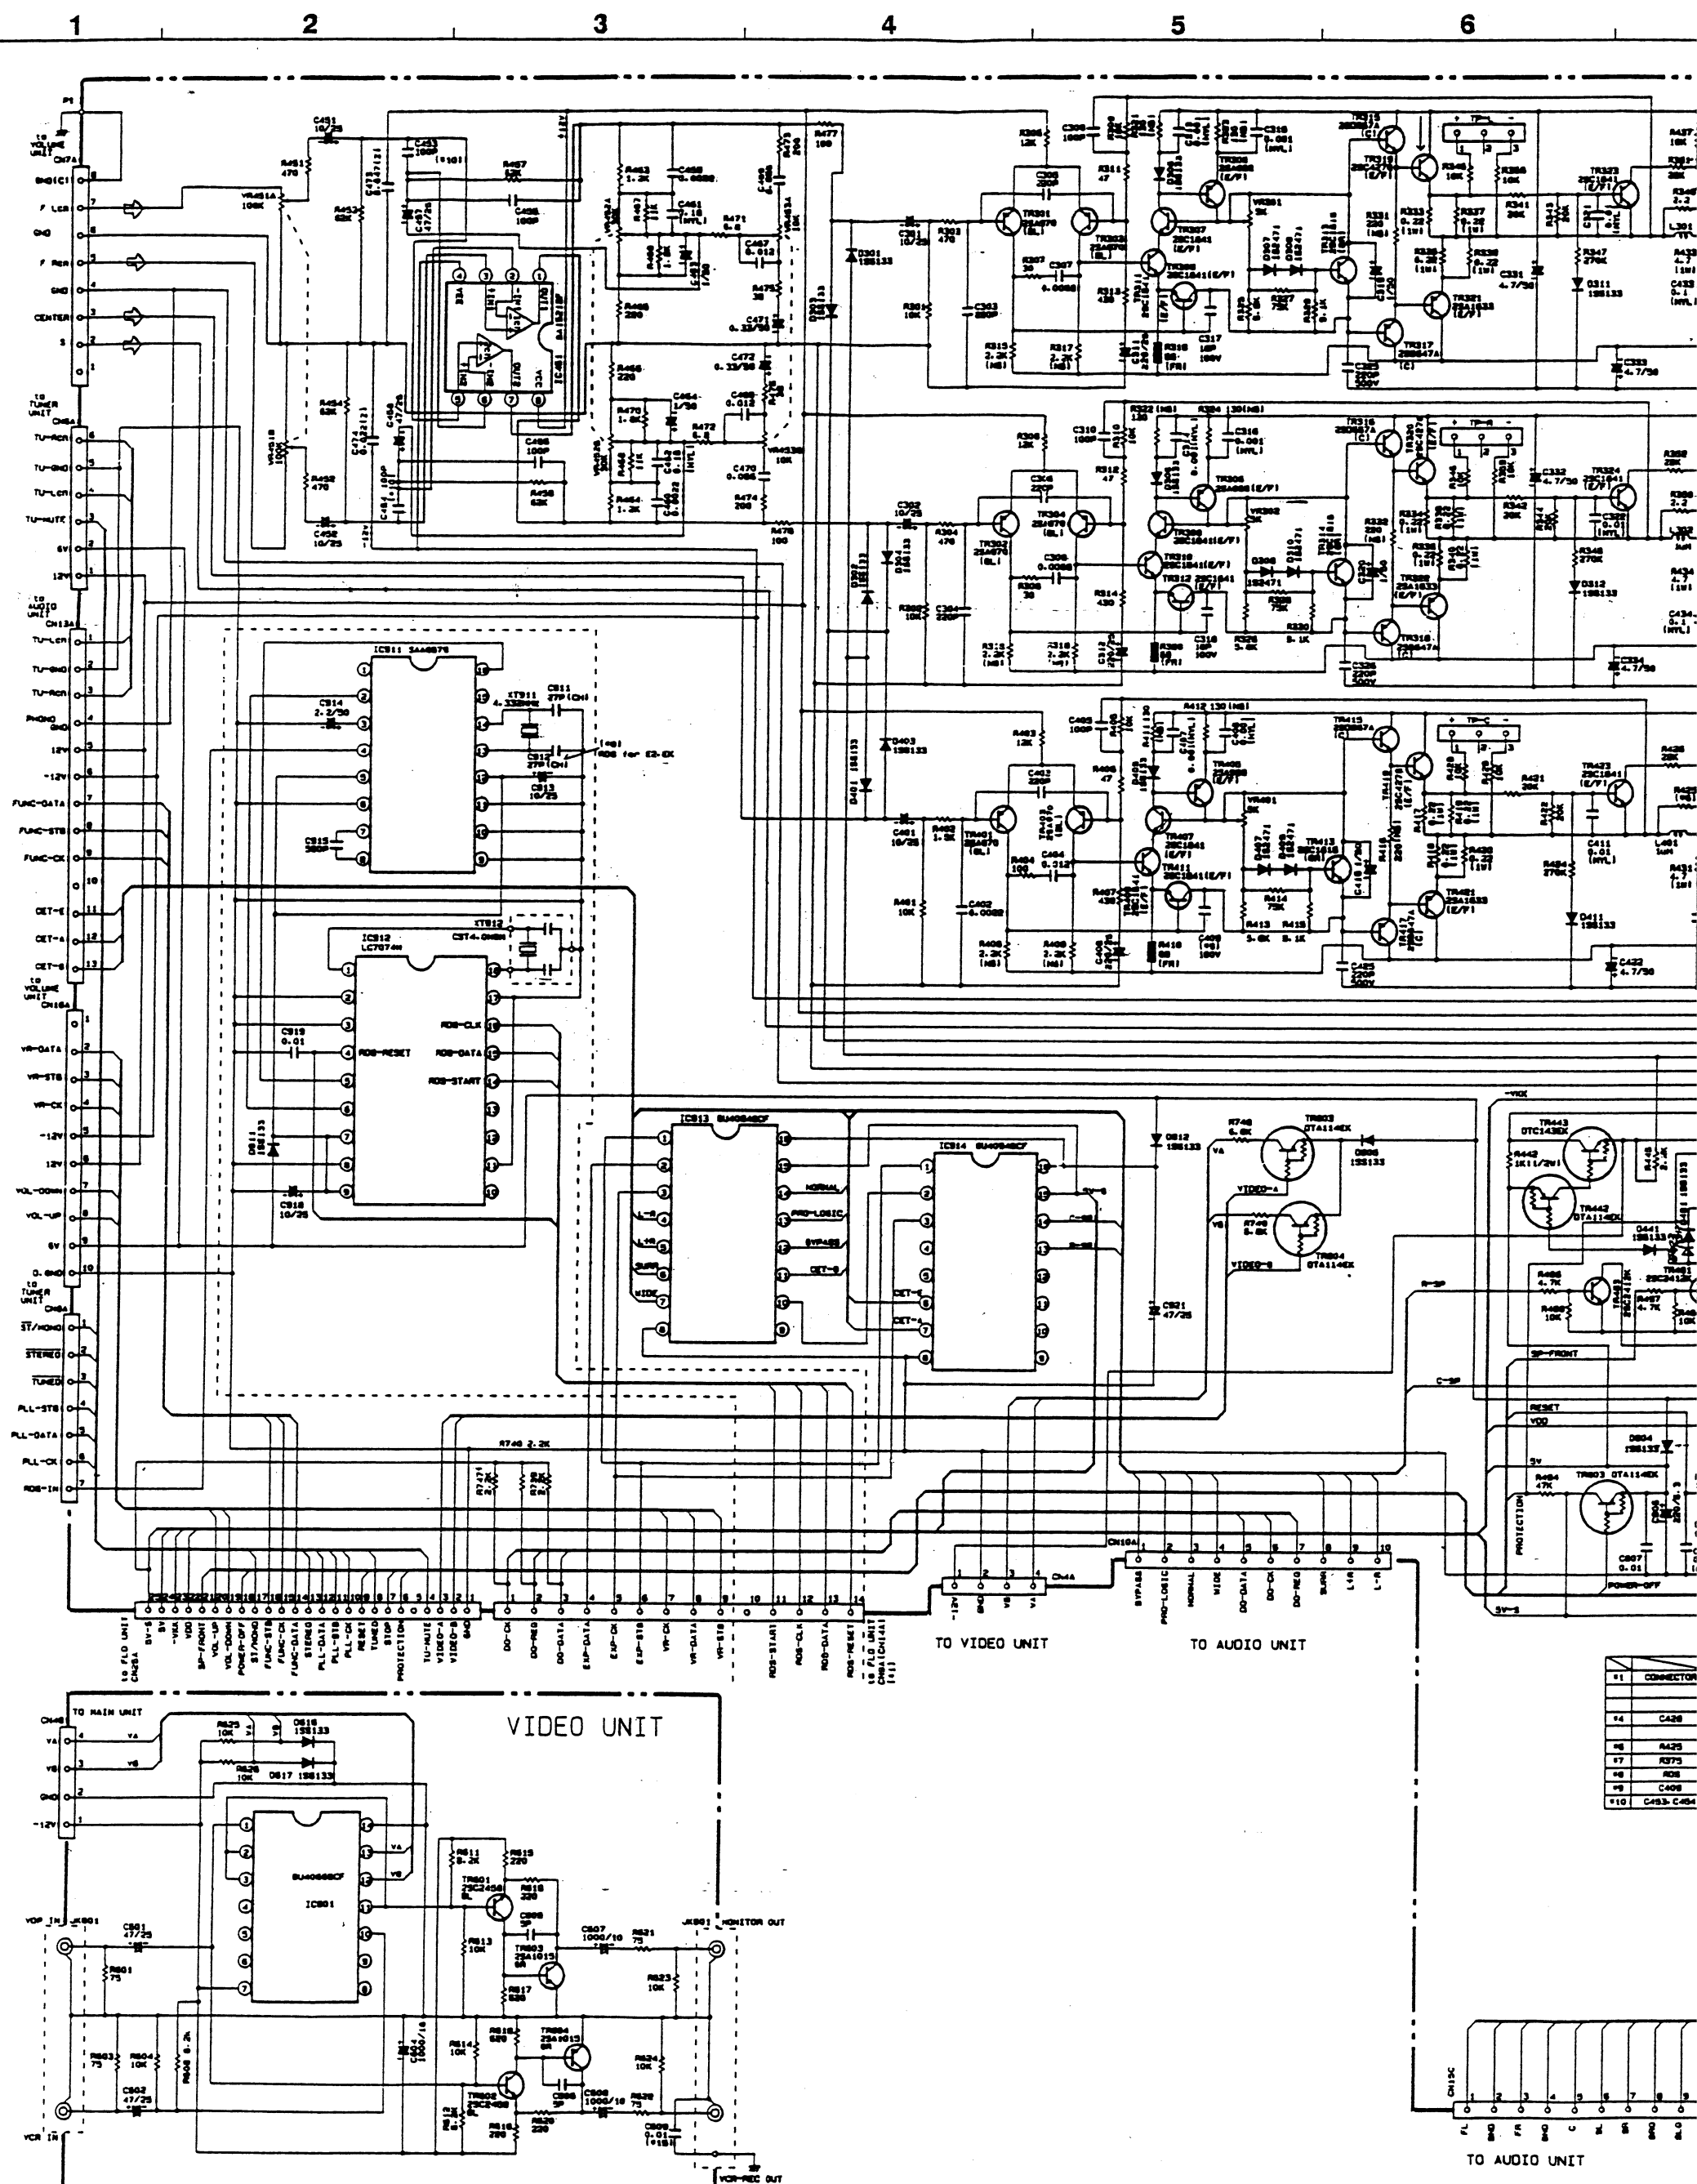

NOTICE
 ALL RESISTANCE VALUES IN OHM. k=1,000 OHM M=1,000,000 OHM
 ALL CAPACITANCE VALUES IN MICRO FARAD. P=MICRO-MICRO FARAD
 EACH VOLTAGE AND CURRENT ARE MEASURED AT NO SIGNAL INPUT
 CONDITION.
 CIRCUIT AND PARTS ARE SUBJECT TO CHANGE WITHOUT PRIOR
 NOTICE.

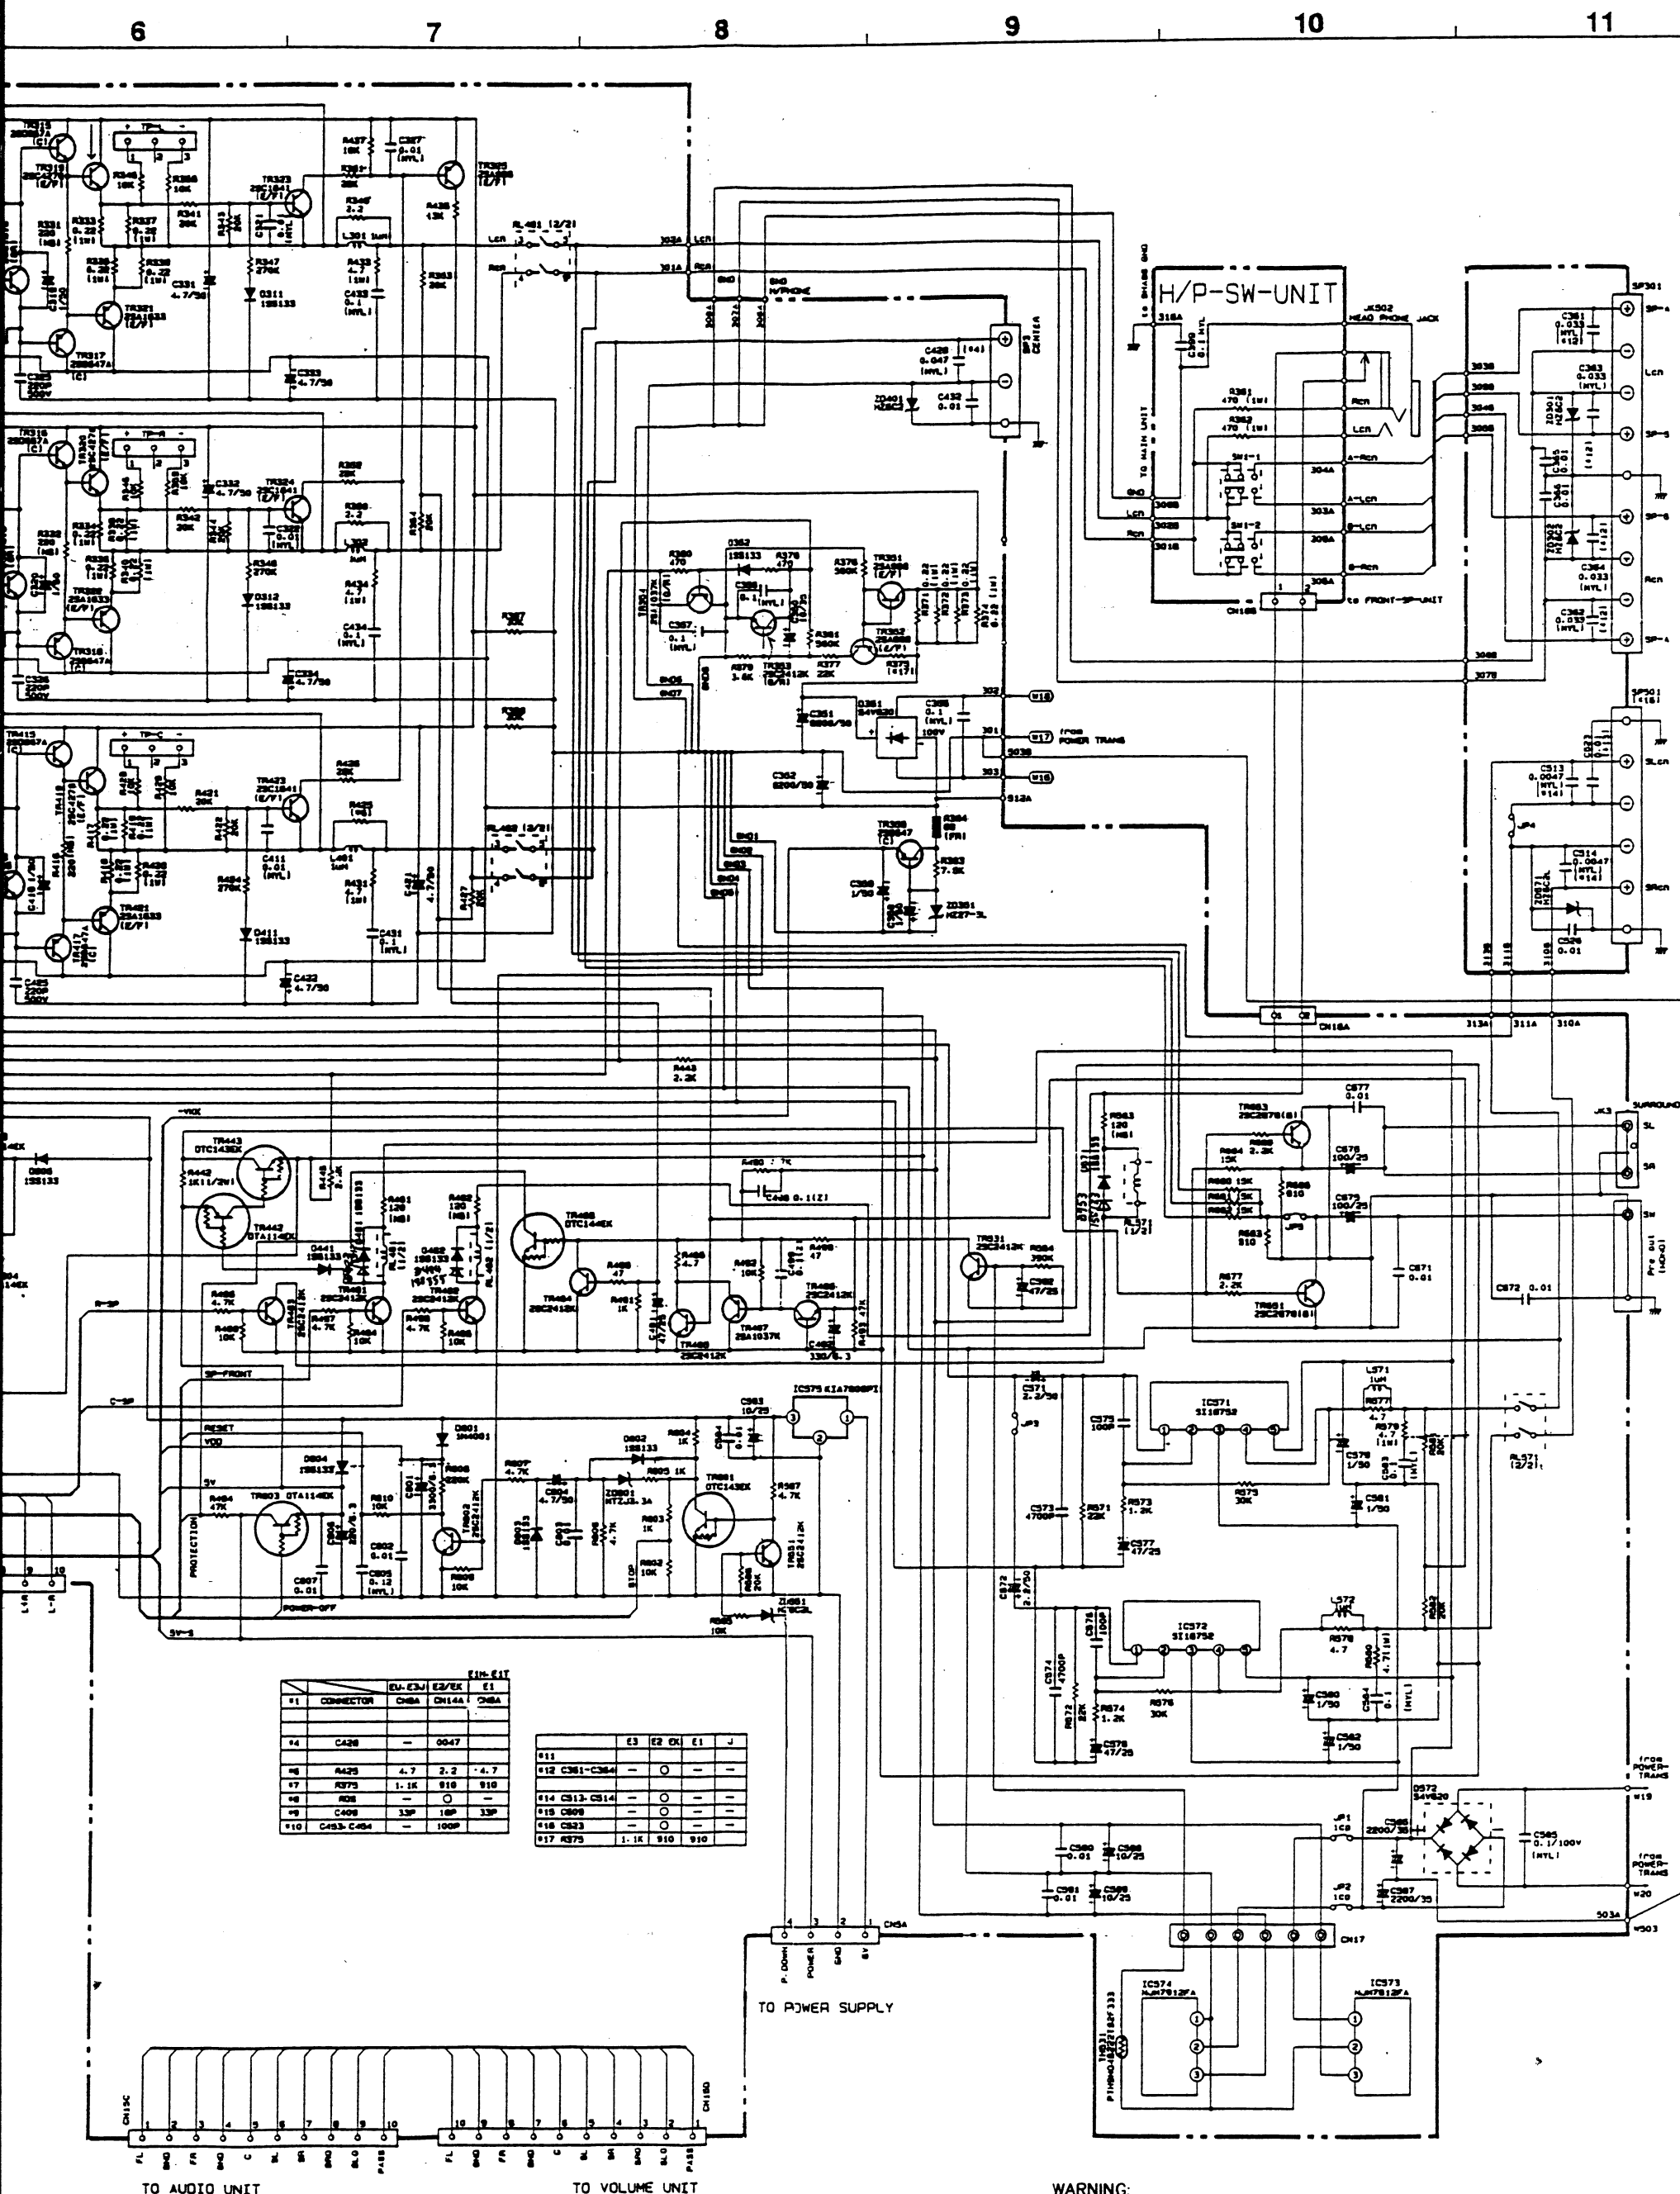

WARNING:
 Parts marked with this symbol  have critical characteristics.
 Use ONLY replacement parts recommended by the manufacturer.

CAUTION:
 Before returning the unit to the customer, make sure you make either (1) a
 leakage current check or (2) a line to chassis resistance check. If the leakage
 current exceeds 0.5 milliamps, or if the resistance from chassis to either side
 of the power cord is less than 240 kohms, the unit is defective.

WARNING:
 DO NOT return the unit to the customer unit the problem is located and
 corrected.
